

Environmental Disclosure Statement (New Jersey)

Electricity Supplied from June 1, 2016 to May 31, 2017

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricity product with electricity products offered by other electric suppliers. The data shown below are default values and do not necessarily reflect the energy that Spring Power & Gas will supply.

ENERGY SOURCE

Spring Power & Gas relied on these energy resources to provide the electricity product.

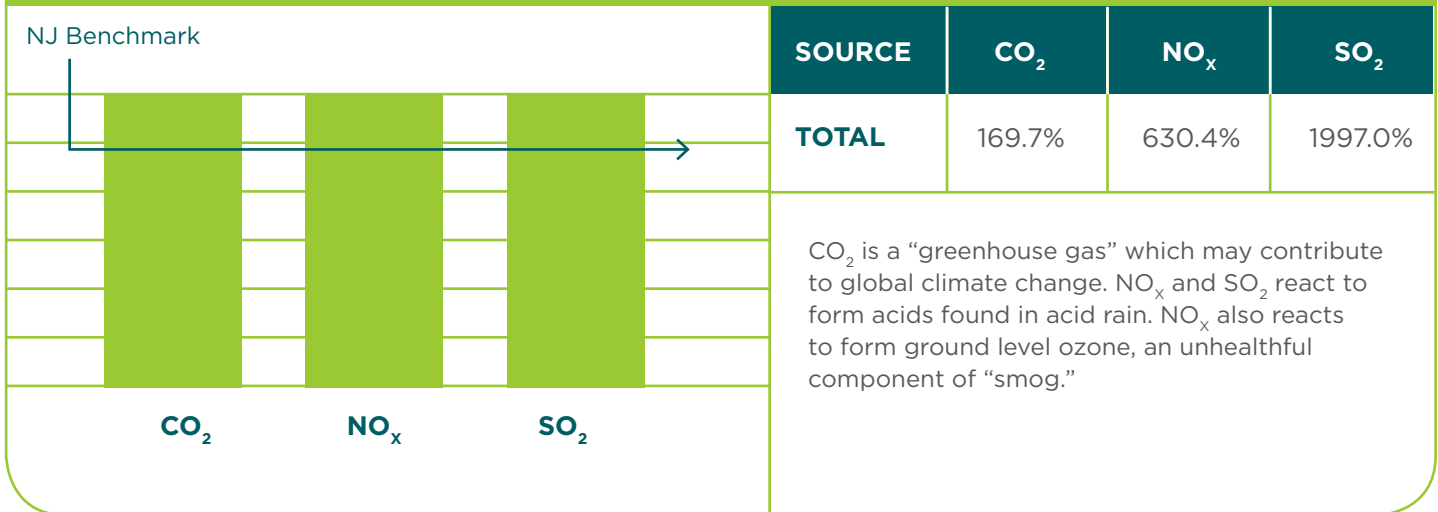

This disclosure is required by the New Jersey Board of Public Utilities.

For specific information about this product, please contact:

Spring Power & Gas | 888 710 4782 | info@springpowerandgas.us | springpowerandgas.us

AIR EMISSIONS

The emission data given are default values and represent the average amount of air pollution associated with the generation of electricity in the region. This amount is compared to the New Jersey benchmark. The benchmark approximates the average emission rate for all electricity generation in New Jersey.

ENERGY CONSERVATION

Spring Power & Gas is not investing in energy conservation measures for this electricity product. Energy conservation measures means less electricity needs to be generated and pollution is avoided.

AVOIDED GENERATION	AVOIDED AIR EMISSIONS
0 kWh	0 tons CO ₂
	0 tons NO _x
	0 tons SO ₂

This disclosure is required by the New Jersey Board of Public Utilities.
